Coding for Beginners Using Scratch

Rosie Dickens

An introduction to coding for complete beginners, this friendly and accessible book will teach children the basics of Scratch (a free, online programme developed by MIT which is widely used in primary schools), allowing them to get inside the code of their computer and create simple games and animations on screen. Computer coding is now a compulsory topic on the UK National Primary Curriculum and this book backs up what is being taught 'Code Clubs' in schools. A return to the days when Usborne was a market-leader in computer books for children. Many of today's tech professionals were inspired by Usborne's coding books from the 1980s! New edition of 9781474950718

Mathematics for Beginners

Sarah Hull, Tom Mumbray, Paul Boston

Can maths make people rich on the stock market? Can formulas to predict which sports teams will win more games? Can equations explain the mysteries of the universe? The short answer to all these is YES. This book explores and explains the ways that the tools of mathematics help people to make sense of the world around them, to predict the future and, just maybe, how to make life itself better.

See Inside Why Plastic is a Problem

Lizzie Cope

Why plastic is so bad for our planet, and what we can do about it. Everyone knows that plastic has become a problem for our planet, but do you know why? And do you know how YOU can help be a part of the solution to the problem? This vividly illustrated book is packed with flaps that explain how plastic is made, what's bad (and sometimes good) about different types of plastic, and the many ways it can cause harm to our rivers, oceans and wildlife. And there are lots of ideas for cutting down on your own reliance on plastic, too. The book was created with expert input from Plastic Oceans UK, a leading campaign and education group all about the problem of plastic.
