Academic Nonfiction
Juvenile & Young Adult

Fascinating books that are perfect for independent learning!
Backyard Bears
Amy Cherrix

In this acclaimed addition to the beloved Scientists in the Field series, author Amy Cherrix follows scientists investigating black bears—and other animals around the globe—who are rapidly becoming our neighbors in urban and suburban areas. With full-color photography.

The Snowy Owl Scientist
Mark Wilson

Are the snowy owls in trouble? Venture into the Alaskan arctic and the summer realm of these predator birds to find out. Discover the diverse species necessary to owl survival, how climate change is affecting the landscape of their nesting site of past millennia, and what it takes to do field research in this action-packed addition to the award-winning Scientists in the Field series.

The Bird Book
Steve Jenkins, Robin Page

Caldecott Honor–winning team Steve Jenkins and Robin Page celebrate the astonishing diversity of bird species in this magnificently illustrated picture book.

Dinosaurs: Fact and Fable
Seymour Simon

A nonfiction picture book all about dinosaurs from renowned and celebrated children's science writer, Seymour Simon!

Fossil Hunter
Cheryl Blackford

A fascinating, highly visual biography of Mary Anning, the Victorian fossil hunter who changed scientific thinking about prehistoric life and would become one of the most celebrated paleontologists of all time. Perfect for children learning about women scientists like Ada Lovelace, Jane Goodall, and Katherine Johnson.

The Age of Dinosaurs: The Rise and Fall of the World’s Most Remarkable Animals
Steve Brusatte

Written by Steve Brusatte, a rising star in the world of paleontology and author of the New York Times bestselling book The Rise and Fall of the Dinosaurs, this new middle grade nonfiction book will fascinate readers as they learn about the history of these remarkable animals, what caused them to evolve and go extinct, and the science we use to make new discoveries about them every day.

A Dinosaur A Day
Miranda Smith, Jenny Wren, Xuan Le, Max Rambaldi, Juan Calle, Olga Baumert

A dinosaur for every day of the year!

Kid Paleontologist
Julius Csotonyi, Thomas Nelson

Blast into the past and make amazing discoveries through the dinosaur era with Kid Paleontologist. Introduce young readers to the wonders of the prehistoric era and answer little kids’ big questions about dinosaurs. Covering millions of years of prehistory and following in the footsteps of the biggest reptiles to walk the Earth, this accessible book breaks difficult concepts down into kid-friendly language so learning is easy and fun for everyone. Get up close and personal with your favorite dinos, including the ferocious T. rex, Velociraptor, Apatosaurus, Brachiosaurus, and more. This book features:
The Ultimate Reptile Field Guide
Applesauce Press

Take a look into the hidden world of your favorite cold-blooded creatures with The Ultimate Reptile Field Guide—created as if an herpetologist painted these illustrations and made these notes while out collecting research.

Pick up the journal of a nature explorer and discover the best reptiles the world has to offer. Encounter reptiles of all shapes and sizes and note observations on each species’ appearance, diet, hunting strategies, and more. This spectacular visual guide gets you up close and personal with these awesome reptiles.

This field guide features:

Kid Oceanographer
Applesauce Press

Discover amazing species, marine ecosystems, and underwater marvels with Kid Oceanographer.

Introduce young readers to the wonders of the sea and answer little kids’ big questions about these incredible marine environments. How deep is the ocean? Did you know there are underwater volcanoes? How many species live in the sea? Why do tsunamis start? From the depths of the Mariana Trench to vibrant coral reefs, let this book be your guide to the mysteries of the seven seas. An astounding 80 percent of the ocean has never been explored, mapped, or even seen by humans. We've explored more of the moon and Mars than we have our own ocean floor! Oceanographers and marine biologists

Coding for Beginners Using Scratch
Rosie Dickens
An introduction to coding for complete beginners, this friendly and accessible book will teach children the basics of Scratch (a free, online programme developed by MIT which is widely used in primary schools), allowing them to get inside the code of their computer and create simple games and animations on screen. Computer coding is now a compulsory topic on the UK National Primary Curriculum and this book backs up what is being taught 'Code Clubs' in schools. A return to the days when Usborne was a market-leader in computer books for children. Many of today's tech professionals were inspired by Usborne's coding books from the 1980s! New edition of very popular.

Build Your Own Website For Beginners
Laura Cowan
A simple user-friendly book which helps complete beginners of all ages get started using the web languages, HTML, CSS and JavaScript. After finishing this book, readers will have built their own website from scratch. With step-by-step instructions at every stage and quirky illustrations throughout. • Computer coding is now a compulsory topic on the UK National Primary Curriculum and this book backs up what is being taught 'Code Clubs' in schools. HTML, CSS and JavaScript are the essential languages for web design. This book acts as a handy guidebook providing the most relevant and useful instructions, terminology and examples. No one is too old to build their own website and this book is accessible to

Pitter Pattern
Joyce Hesselberth
Patterns are everywhere! How many can you find? This gorgeously illustrated book from Joyce Hesselberth, the creator of the acclaimed Mapping Sam, expertly introduces readers to basic patterns in nature, music, sports, art, language, and math. Pitter Pattern is an exceptional mix of fiction and nonfiction perfect for the classroom, where patterns serve as the building blocks to all subjects. For readers of Peter Reynolds’s The Dot, Lois Ehlert’s Lots of Spots, and Joyce Sidman’s Swirl by Swirl.

A Hundred Billion Trillion Stars
Seth Fishman, Isabel Greenberg
A Boston Globe–Horn Book Honor Book and winner of the Mathematical Book Prize! From a hundred billion trillion stars to one unique you, this fun and playful picture book illuminates some of the biggest numbers in the universe in an accessible, kid-friendly story to sit beside the classic bestseller How Much Is a Million? “This picture book is one in a gazillion,” says Jane O’Connor, the New York Times–bestselling author of the Fancy Nancy series.

Look Inside a Hospital
Katie Daynes
Look Inside a Hospital is a fabulous addition to the Look Inside series, a fascinating insight into what really goes on in a hospital and an important book for any child who might be visiting ill relatives or need to go into hospital themselves. Find out what it’s like to stay overnight, how operations happen and where babies are born. Flaps on every page reveal intriguing action behind the scenes, including where the surgeons get scrubbed up and where the vomit bowl is emptied! The Emergency spread has a full page gatefold to show even more busy action. Includes internet links to websites with video clips and activities to find out more about hospitals and meet patients, doctors and nurses.

A Writer’s Notebook: New and Expanded Edition
Ralph Fletcher
A refreshed edition of the perennially popular guide to effectively keeping a writing notebook for a new generation of young aspiring authors, including new cover artwork and nine chapters of new content from acclaimed author Ralph Fletcher.

Mathematics for Beginners
Sarah Hull, Tom Mumbray, Paul Boston
Can maths make people rich on the stock market? Can formulas predict which sports teams will win more games? Can equations explain the mysteries of the universe? The short answer to all these is YES. This book explores and explains the ways that the tools of mathematics help people to make sense of the world around them, to predict the future and, just maybe, how to make life itself better.
See Inside Why Plastic is a Problem

Lizzie Cope

Why plastic is so bad for our planet, and what we can do about it. Everyone knows that plastic has become a problem for our planet, but do you know why? And do you know how YOU can help be a part of the solution to the problem? This vividly illustrated book is packed with flaps that explain how plastic is made, what’s bad (and sometimes good) about different types of plastic, and the many ways it can cause harm to our rivers, oceans and wildlife. And there are lots of ideas for cutting down on your own reliance on plastic, too. The book was created with expert input from Plastic Oceans UK, a leading campaign and education group all about the problem of plastic.

Seymour Simon

From award-winning science writer Seymour Simon comes a revised edition of the nonfiction photographic picture book all about the human digestive system!

Destination: Moon

Seymour Simon

From bestselling science writer Seymour Simon comes Destination: Moon, a visually stunning and very accessible look at the lead up to the 1969 Moon landing. Updated with an airy design and chock-full of NASA photos and sidebars, it’s perfectly timed with the 50th anniversary of the Moon landing.

Look Up with Me

Jennifer Berne, Lorraine Nam, Neil deGrasse Tyson

Author Jennifer Berne and cut-paper illustrator Lorraine Nam tell the true, inspiring tale of how Neil deGrasse Tyson turned his passion for the stars into a life of educating others as a world-famous astrophysicist. With an introduction from Dr. Tyson himself, this is the perfect gift for young astronomers and fans of all ages. Now in paperback!

24 Hours in Space

Rob Lloyd Jones

Daily life on the International Space Station shown in lively comic strip. Join an astronaut for a day as she goes on her first ever spacewalk, and new crew members arrive. Find out how she trained for her mission and what it’s like living and working in space. How do you eat and drink at zero gravity? How do space toilets work? What are space suits designed for?

Lots of Things to Know About Your Body

Sarah Hull, Susanna Rumiz

You’ll never guess what doctors call tummy rumbles or how many smells your nose can recognise, and did you know that you could catch a yawn? This delightful information book is full of fun and surprising things to know about the human body, all brought to life by Susanna Rumiz’s warm, humorous illustrations. You’ll be amazed by what’s inside!

Rotten!

Anita Sanchez, Gilbert Ford

Things going rotten in all of their slimy glory are fascinating, and kids will love learning how vultures, fungi, dung beetles, and more aid in this smelly aspect of the life cycle that’s right under our noses.

How Colour Works

Catherine Barr, Yuliya Gwilym

The science of color as you’ve never seen it before – this captivating book for kids aged 5+ covers key STEAM subjects: science, technology, engineering, art and math. Why is the sky blue? Why is snow white and darkness black? How do our eyes and brain create a world of color?
